The data I will be using for non API is from foursquare about the top nightlife spots in Norman, OK. It interests me because I am curious about most popular nightlife spots are and their price levels too . It will not be really useful for me in the future but it interesting to know.

## 2   4

The data is used is from Quandl and relates to unemployment data from FRED. It's interesting because political figures will use this data to take credit for progress that might not really belong to them.

   The packaged used was quandl
